

KOBELCO

SK34SR-7/SK39SR-7

Performance  Design

SK34SR SK39SR

■ Bucket capacity:

SK34SR 0.09 m³

SK39SR 0.11 m³

■ Engine power:

18.9 kW / 2,400 min⁻¹

■ Operating weight:

SK34SR 3,380 – 3,660 kg

SK39SR 3,780 – 4,060 kg

Complies with the EU Stage V
exhaust emission regulation

Built for Perfectionists™

Performance Design

Mini excavator SK34SR/SK39SR of KOBELCO has realised a completely new value by harmonising PERFORMANCE and DESIGN.

Performance enhancements offer greater efficiency and productivity along with increased power and speed. Design improvements provide the ultimate in comfort and control.

KOBELCO refuses to compromise, creating machines that meet every challenge.

UNFORGETTABLE COMFORT

Our pursuit of functional beauty and aesthetic sense produced a new interior design.

Air suspension seat

A proven Grammer suspension seat is fitted as standard, offering a reclining mechanism, shock absorber, and excellent seating comfort.

Wrist rests

The enlarged wrist rests keep the operator's forearms in a stable position, reducing fatigue during operation, and allowing stable operation.

Air conditioner

Additional air vents provide an air flow to envelop the operator's body. In addition, the defrosters placed in front, right and back have also been improved to ensure visibility when the air conditioner is in use.

LED Illumination

Dials and buttons are now backlit to provide a bright, clear view in any lighting condition.

Smartphone holder/ USB/AUX port

FUNCTIONAL WORK ENVIRONMENT

Realisation of the operator's convenience and comfort.

Colour monitor

A colour display with good readability comes as standard and shows various information such as operating history, maintenance cycle, and fuel and water temperature gauges. It can also be used to adjust the hydraulic oil flow to the attachments.

Energy conservation mode

There are 2 working modes: one for maximum power, and ECO-mode for increased fuel economy.

Auto deceleration

Auto deceleration saves fuel and lowers engine noise by lowering engine speed to idle.

Hydraulic flow adjustment (Option)

Rotation or N&B piping flow can be selected from six preset types, or adjusted arbitrarily.

Engine start password

A password is required when starting the engine for greater security.

Maintenance information

Operation history

Easy-access cab

The hinged door is adopted to provide large entrance space. Furthermore, the flip-up left console with integrated pilot control lock lever allows for easy entry and exit from the cab.

Ergonomic lever angles

Operators can move levers horizontally without twisting their wrists, reducing fatigue.

Proportional hand control for rotation & N&B piping (Option)

Precise proportional controls are integrated into the joystick for ease of operation.

Slide-open window

The right side window can slide open from the front or the back for increased ventilation and to hear ground workers when required.

DAB+ radio (FM/AM & AUX & Bluetooth* & hands-free telephone)

Speaker

12V power outlet

Coat hook

Cup holder

Utility box

LED door light

Front under glass holder

EXPERIENCING A COMPETENT PERFORMANCE

The new hydraulic system

Compared to previous models, the new hydraulic system is significantly improved, which thereby shortens the digging cycle time remarkably. It attains high performances without reducing the speed even when a heavy load is applied.

By replacing the bucket cylinder,
the bucket digging force is increased.

>>> Bucket digging force

Raised by 16%

(Compared to previous models)

The engine output is increased compared to previous
models, providing extra power.

>>> Engine output

18.9 kW / 2,400 min⁻¹

The newly adopted ECO-mode saves
even more energy.

>>> Fuel consumption

Reduced by 25%

(Compared to H-mode)

Smoother operation

The new hydraulic system improves levelling performance and makes levelling work easier than with conventional machines when heavier attachments are installed.

Integrated-Flow Pump System

During the digging operation, depending upon job condition, the machine provides the additional flow to the boom, arm or bucket circuit, from No.3 pump (swing and dozer pump), to increase available input power to those functions.

COMPACT, YET, BIG PERFORMANCE

Min. swing radius
at boom swing

1,910 mm (SK34SR)
1,930 mm (SK39SR)

Figures above show the values for
cab with standard arm spec.

Tail swing
radius

775 mm (SK34SR)
850 mm (SK39SR)

Short tail swing

The compact tail swing improves operating
efficiency in limited space.

Tail overhang

0 mm (90 mm)

(without rear view mirror)

Figure in () shows the value with
additional counterweight.

5,200 mm (SK34SR)
5,350 mm (SK39SR)

4,790 mm (SK34SR)
4,870 mm (SK39SR)

2,830 mm (SK34SR)
3,050 mm (SK39SR)

Arm length 1.32 m (SK34SR)
1.37 m (SK39SR)

Figures above show the values for cab.

Wide working range

Long arms are provided as option equipment to
ensure a wide working range.

VERSATILITY

Hydraulic piping for quick hitch (Option)

Various attachments, such as the bucket, can be easily mounted and dismounted without leaving the cab, increasing working speed.

Dozer lever

The new ergonomic dozer lever has 1st/2nd travel speed select switch integrated into the handle for easier dozer functions.

Dozer-blade shape

KOBELCO's unique blade design solves this problem by forming the earth into an arc that always falls forward. Because this prevents earth from falling behind the blade, only "one pass" is needed.

Angle dozer (Option)

Built-in the same durability as the standard blade, this angle option provides 25 to 25 degrees of left and right angle movement for clearing, grading and back-filling. The angle dozer gives you better control for following changing terrain.

Floating dozer (Option)

Dozer float is optional to assist in easier leveling work. Floating function can be activated by the switch which is integrated into the dozer control lever.

RELIABLE CONSTRUCTION

The boom, arm and swing bracket all have large cross-section segments for added attachment strength.

Forged boom top

Boom cylinder guard

Plate type pin

Bucket

Cast-iron idler link provides greater strength.

Dozer

Reinforced dozer supports provide greater strength.

Swing bracket

Large, thick cast-iron swing bracket/front bracket.

Hydraulic hosing

The hydraulic hosing is housed inside the swing bracket for protection.

NON-STOP OPERATION BY iNDr

Ultimate low noise

KOBELCO's exclusive iNDr Cooling System delivers amazingly quiet operation.

Sound Power Level

iNDr

A high-density mesh filter blocks dust intruding during air intake. This prevents the cooling device and the air cleaner from clogging with dust and maintains their performances. The ridges of the corrugated filter allow the air to pass through, and the grooves collect the dust, which prevents the filter from clogging.

The iNDr filter has a high-density mesh of 30 lines per inch to collect dust.

EASY MAINTENANCE

Easy daily maintenance that saves the trouble of inspection and cleaning.

Easy Access to Component Inside the Cab

Hour meter

Cab fresh air intake filter

Cab re-circulation air filter

Operator manual storage pockets

Easy Access to Cooling Unit

iNDr filter

Laid out for easy access to radiator and cooling system.

Easy Access to Engine Compartment

- ① Pre fuel filter with built-in water separator
- ② Air cleaner
- ③ High-grade fuel filter

OPERATOR SAFETY

Reliable cab/canopy structure

The high-strength cab/canopy meets ROPS, TOPS and OPG Level 1 (Top guard) standards for greater operator safety.

LED work light

Changed from halogen light to LED light for more brightness.

Safety valve for boom cylinder

Safety valve for arm cylinder

Rear wiper (Only cab)

Good visibility

The wiper mount has been moved to the upper right of the cab support and the skylight opening has been enlarged, improving visibility to the front and above.

Rear view mirror

Rear under mirror

Emergency escape hammer

Accumulator for emergency attachment lowering

An installed accumulator allows the attachment to be safely lowered to the ground using in-cab controls in the event of an unexpected engine shut-down and class leading smooth operation.

Specifications

Engine

Model	YANMAR 3TNV88
Type	Four-cycle, water-cooled, direct injection diesel engine, complies with EU Stage V exhaust emission regulation
No. of cylinders	3
Bore and stroke	88 mm x 90 mm
Displacement	1,642 ml
Rated power output	17.9 kW / 2,400 min ⁻¹ (ISO 9249 : with fan)
	18.9 kW / 2,400 min ⁻¹ (ISO 14396: without fan)
Max. torque	88.0 N·m / 1,440 min ⁻¹ (ISO 14396: without fan)

Hydraulic system

Pump			
Type	Two variable displacement axial piston pumps + one gear pump + pilot pump		
Max. discharge flow	2 x 38.4 L/min	1 x 19.2 L/min	1 x 10.8 L/min
Relief valve setting			
Boom, arm and bucket	23.0 MPa {235 kgf/cm ² }		
Travel circuit	23.0 MPa {235 kgf/cm ² }		
Swing circuit	20.0 MPa {204 kgf/cm ² }		
Control circuit	3.5 MPa {36 kgf/cm ² }		
Pilot control pump	Gear type		
Main control valve	10-spool valve		
Oil cooler	Air cooled type		

Swing system

Swing motor	One fixed displacement piston motor
Brake	Hydraulic; locking automatically when the swing control lever is in the neutral position
Parking brake	Wet multiple plate
Swing speed	8.2 min ⁻¹
Swing torque	7.0 kN·m
Maximum swing gradient (Loaded)*	28 % {16 °}

*Value for the least favourable specification

Travel system

Travel motors	Two variable displacement piston motors	
Travel brakes	Hydraulic brake	
Parking brakes	Wet multiple plate	
Travel shoes	88 each side	
Travel speed	4.4/2.5 km/h (rubber shoe)	
	4.3/2.4 km/h (steel shoe)	
Drawbar pulling force	SK34SR	38.2 kN (Cab) / 38.3 kN (Canopy)
	SK39SR	38.0 kN (Cab) / 38.1 kN (Canopy)
Gradeability	58% (30°)	

Cab & control

Cab	
All-weather, insulated floor mat.	
Control	
Two hand levers and two foot pedals for travel	
Two hand levers for excavating and swing	
Electric rotary-type engine throttle	
Foot control (for boom swing)	
Foot control (for N&B piping)	
Dozer lever	
Noise levels	
External	93 dB(A) (2000/14/EC)
Operator	81 dB(A) (ISO 6396)

Notes:

- Do not attempt to lift or hold any load that is greater than these lift capacities at their specified lift point radius and heights. Weight of all accessories must be deducted from the above lift capacities.
- Lift capacities are based on machine standing on level, firm, and uniform ground. User must make allowance for job conditions such as soft or uneven ground, out of level conditions, side loads, sudden stopping of loads, hazardous conditions, experience of personnel, etc.
- Arm top defined as lift point.
- The above lift capacities are in compliance with ISO 10567. They do not exceed 87% of hydraulic lift capacity or 75% of tipping load. Lift capacities marked with an asterisk(*) are limited by hydraulic capacity rather than tipping load.
- Operator should be fully acquainted with the Operator's and Maintenance Instructions before operating this machine. Rules for safe operation of equipment should be adhered to at all times.
- Lift capacities apply to only machine as originally manufactured and normally equipped by KOBELCO CONSTRUCTION MACHINERY CO., LTD.

Note: This catalogue may contain attachments and optional equipment that are not available in your area. And it may contain photographs of machines with specifications that differ from those of machines sold in your areas. Please consult your nearest KOBELCO distributor for those items you require.
Specialist equipment is needed to use this machine in demolition work. Before using it please contact your KOBELCO dealer.
Due to our policy of continuous product improvements all designs and specifications are subject to change without advance notice.
